Delay (switching time, dark-light)	50 – 470 ms

Authorised Wholesaler

Trust in a brand can't be built overnight. It takes years to become known and even longer to be trusted.

In 1981, the Speedglas brand released the first ever auto-darkening welding helmet ever and has consistently set the benchmark ever since.

While other products and brands have come and gone, 3M Speedglas has been used by professional welders for over 40 years.

Designed in Sweden, Speedglas remains the world's leading brand of personal protective equipment for welders and continues to drive innovation within the industry.

Apex Welding Safety or AWS as they are known in the welding industry, has been the sole agent for the 3M Speedglas brand in Australia and New Zealand for over 30 years.

3M™ Speedglas™ Generation 5 Welding Helmets The right equipment for each job
