

 **Speedglas™**
Welding Safety

3M™ Speedglas™ G5-03NC Pro Air Welding Helmet with Heavy-Duty Adflo™ PAPR

Why 3M™ Speedglas™?

The #1 brand in welders' PPE

Trust in a brand can't be built overnight. It takes years to become known and even longer to be trusted. In 1981, over 40 years ago, Speedglas™ released the first ever auto-darkening welding helmet and has consistently set the benchmark ever since.

While other products and brands have come and gone, the 3M Speedglas brand, guided by welders, has continued to drive innovation and lead from the front.

Made in Sweden, Speedglas is the brand of choice for professional welders and remains the world's leading brand of personal protective equipment for welders.

The 3M Speedglas Welding Helmet G5-03 Pro Air is built for professional welders. A welding helmet versatile enough that you don't have to compromise on function, performance OR safety.

NEW Welding Fume Workplace Exposure Standard!

The Safe Work Australia Workplace Exposure Standard (WES) for welding fume was lowered from **5mg/m³** to **1mg/m³** in January 2024. This new limit applies to welders and anyone who may be exposed to welding fume. All workplaces must comply by law.

The exposure standards in Australia and New Zealand do not identify a dividing line between a healthy or unhealthy working environment. They simply establish a legal maximum upper limit. Therefore, as per their legal responsibility, employers must reduce welding fume exposure to as low as reasonably practicable.

The 2017 reclassification of welding fume as carcinogenic prompted many to rethink and challenge what was historically considered 'normal'.

The 2019 statistical analysis concluding that welders have up to a '43% increased risk of lung cancer'¹ regardless of the type of steel

Simple Takeaway

**Welding fume is serious,
action is required.**

welded, the welding process or time-period is of serious public health relevance.

Now, the new welding fume workplace exposure limit in Australia should act as the trigger at your workplace to introduce effective welding fume controls to ensure you are fulfilling your legal responsibility.

To that end, welding helmets with integrated powered air respiratory protection are proven to be highly effective in reducing exposure to welding fume.

Heavy-duty respiratory protection

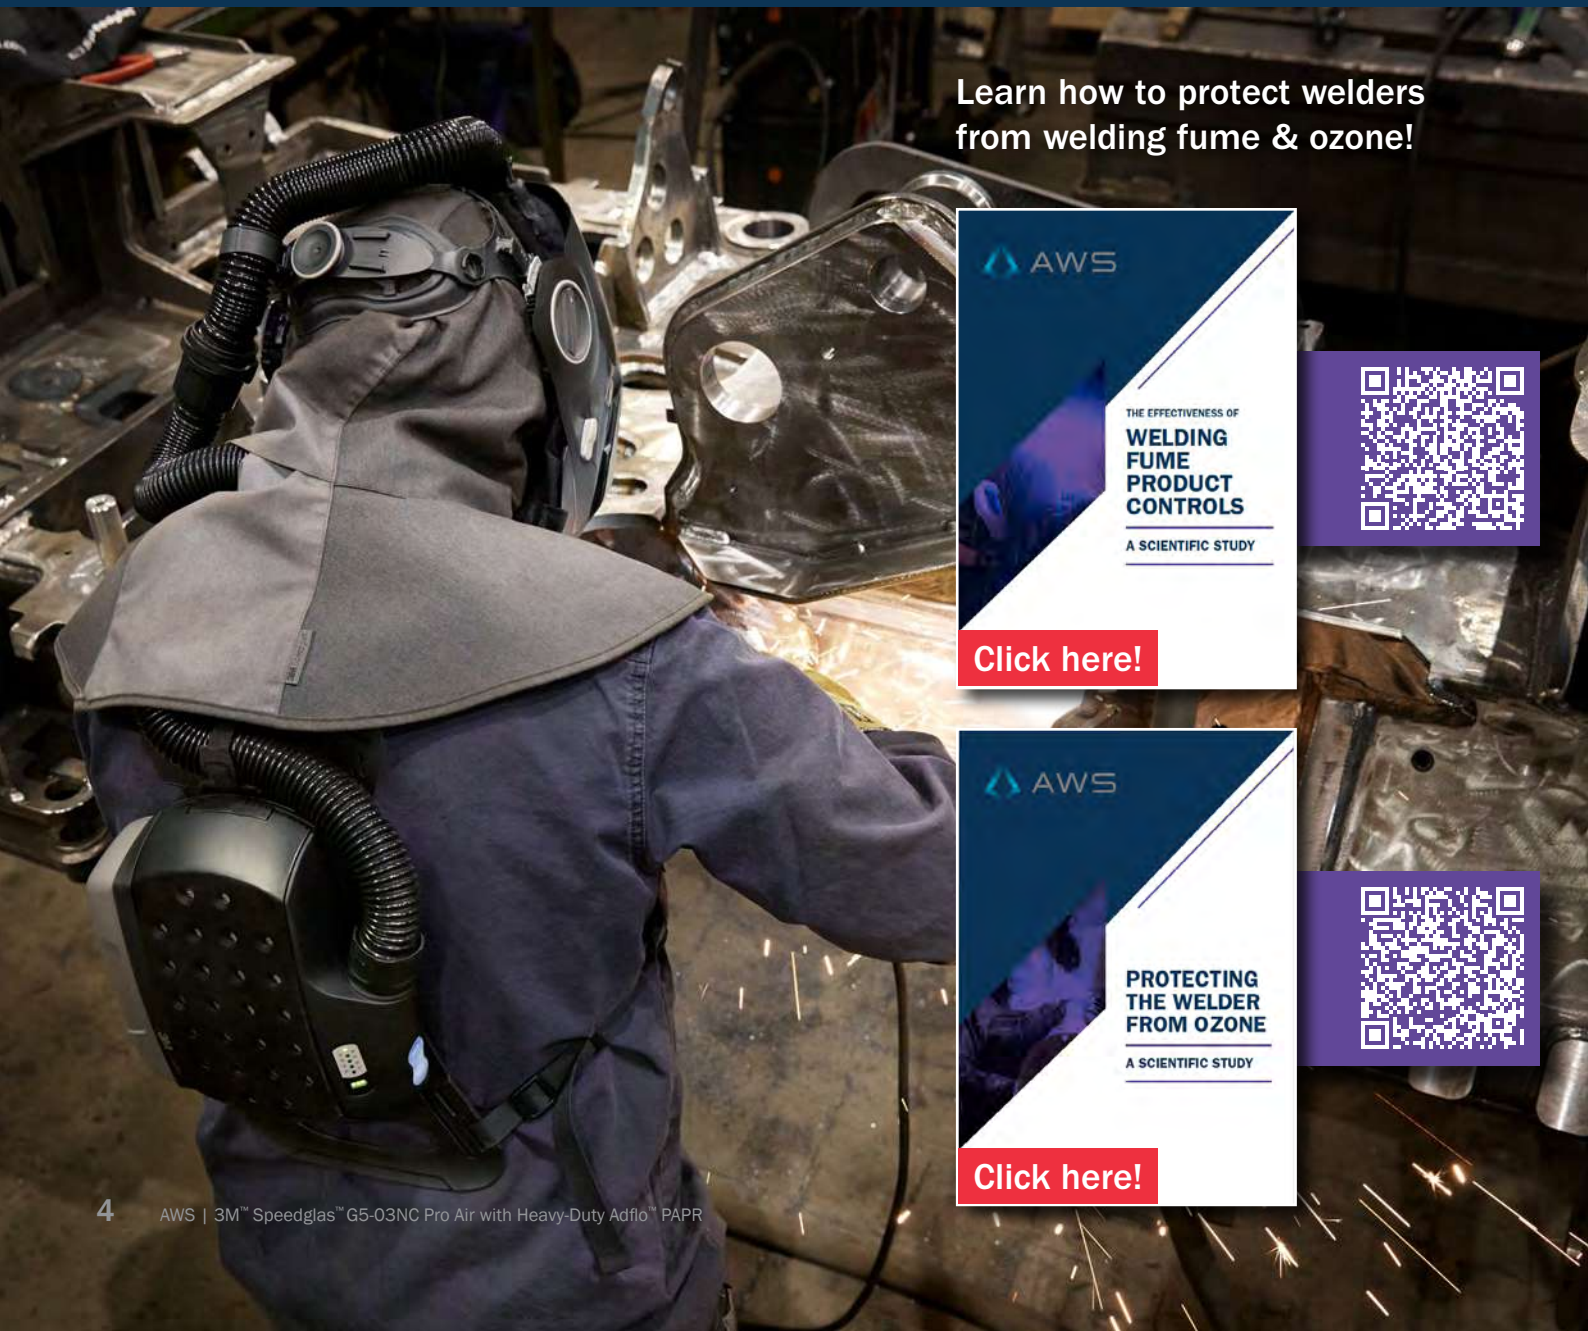

Keeping yourself safe can be straightforward

'Welding helmets with integrated powered air purifying respirators (PAPR) are the most widely used form of respiratory protection amongst welders in Australia and New Zealand'² and are mandatory within many businesses.

The 3M™ Speedglas™ G5-03 Pro Air Welding Helmets with Heavy-Duty Adflo™ PAPR offer welders a view like no other fixed-front welding helmet on the market, while maintaining their desired level of respiratory protection with no breathing resistance.

The powered air respirator goes where the welder goes, allowing unrestricted movement around the workplace with uninterrupted eye, face and respiratory protection.

Furthermore, the Adflo PAPR provides a Required Minimum Protection Factor (RMPF) of 50. This RMPF means the respirator will supply a **minimum 50 times cleaner air** than the welder would otherwise be breathing unprotected.

Mobile and adaptable

3M™ Adflo™ Heavy-Duty Powered Air Purifying Respirator (PAPR)

As one of the most popular respirators of its kind in the world, the Adflo™ Powered Air Purifying Respirator is designed to provide a constant nominal airflow rate of 170/200 litres per minute, regardless of the battery's charge or the particle loading of the filter.

With its slim profile, the Adflo respirator offers excellent lightweight, adaptable and easy-to-use respiratory protection.

Technical Data	3M™ Adflo™ Powered Air Respirator
Approvals Respiratory Protection	Conforms to AS/NZS1716
Required Minimum Protection Factor (RMPF) ¹⁾	50
Airflow Standard Airflow Plus	170 litres/minute 200 litres/minute
Battery: Charging time	Li-ion with rapid charge (0-80% in an hour) ²⁾ 5.5 hours (heavy-duty)
Operating hours	12 hours (heavy-duty)
Weight Respirator	1133 grams
Noise level dB	Max 75 dB
Belt	Leather 75-115cm
<small>Gas and odour filters are available as an optional extra. 1) For mechanically and thermally generated particles. 2) Heavy duty battery will be 80% charged (9.6 hours run time) in approximately one hour.</small>	

Industry leading protection

Since its launch, the 3M™ Adflo™ powered air respirator has become synonymous with welders' respiratory protection. The system is designed to meet the specific needs of welders.

Lightweight with Rapid Charge

The new Li-ion Adflo respirator is over 15% lighter[^] than the older style version with Ni-MH (black) battery. The lightweight battery charges up to 80% capacity in approximately an hour.

Filtered air to breathe

Constant, clean air flows directly into your breathing zone. Choose between 170 litres per minute or 200 litres per minute (for hot, humid jobs) with the push of a button.

[^] When compared to the previous Adflo PAPR system that featured a nickel metal hydride battery.

Adaptable filtration

With the right type of filter, the Adflo powered air respirator effectively protects against a range of gases, vapours and particles.

You only have one set of lungs

The Adflo respirator complies with Australian and New Zealand Standard AS/NZS 1716 for powered air respirators and offers a Required Minimum Protection Factor (RMPF) of 50 for mechanically and thermally generated particles.

Heavy Duty Battery

An Adflo PAPR keeps you protected during long shifts. The Speedglas G5-03 Pro Air comes standard with the heavy duty Adflo battery, which can offer up to 12 hours continuous protection.

3M™ Speedglas™ Welding Helmet G5-03NC Pro Air

Designed for the professional welder, the 3M™ Speedglas™ Welding Helmet G5-03NC Pro Air connects to the heavy-duty 3M™ Adflo™ Powered Air Purifying Respirator (PAPR) for industry leading respiratory protection.

Speedglas G5-03NC welding lens with True-View

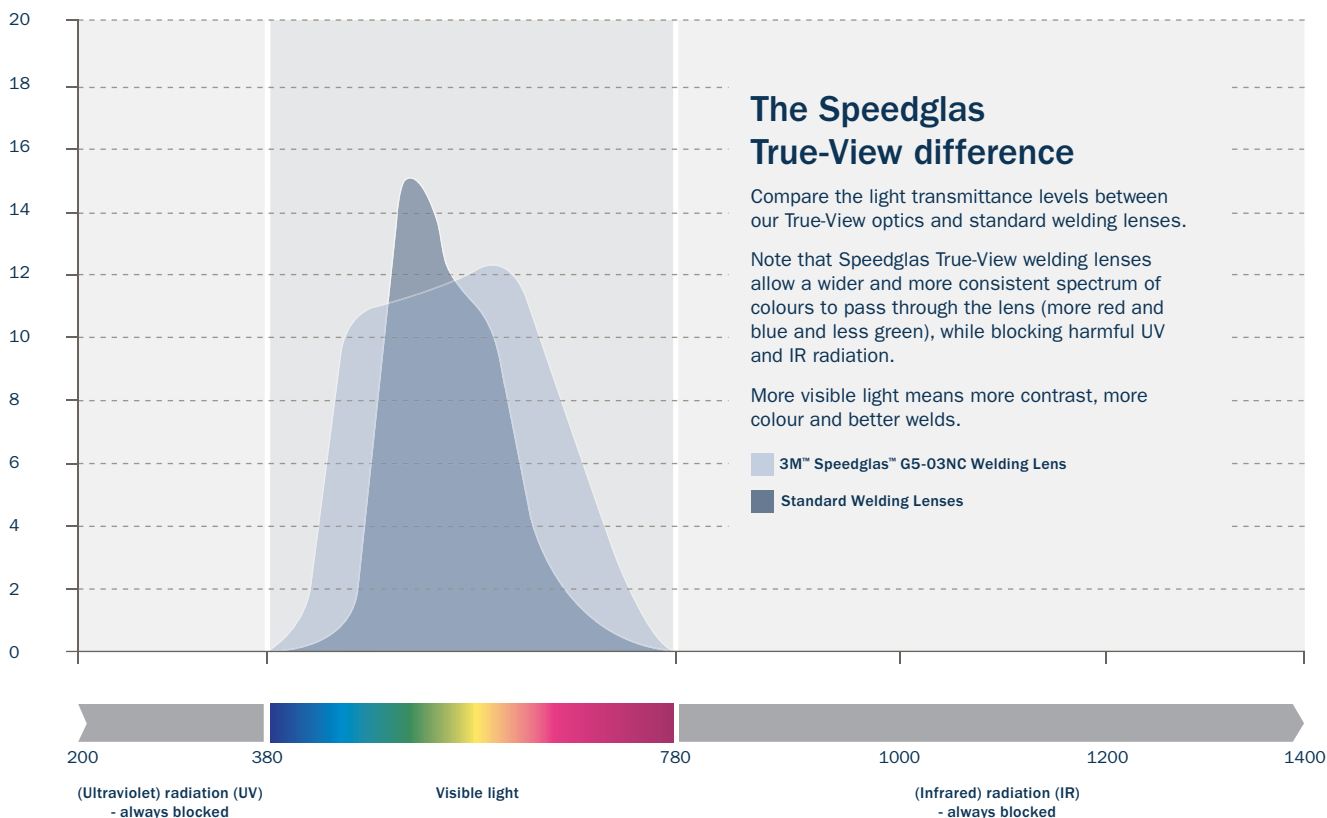

A more natural light state

Imagine what more realistic-looking colours and details could do for your welds:

- Provide better control of your weld puddle – with a view that appears lighter, brighter and more realistic.
- Help you focus on your welding set-up, welding technique and inspection of just-completed welds.
- Give you a clearer view of coloured welding machine controls – even with your helmet in the safe, down position.

Transmittance (%)

Enhance peripheral vision

Speedglas SideWindows give you excellent peripheral vision as you weld.

Previously hidden peripheral hazards such as beams, obstacles, and other workers are now visible through two shade 5 side lenses (with conventional shade 13 UV/IR protection).

Adjust your welding helmet, not yourself

Tailor your head harness to fit your preferences

① **New headband design**

Improved, self-adjusting comfort paddles along your forehead.

② **Adjustment options**

Control the distance and angle from your eyes to the clear visor and welding lens.

③ **Extra-large back pad**

Delivered with an optional extra-large back head pad for enhanced comfort.

Don't go with the flow

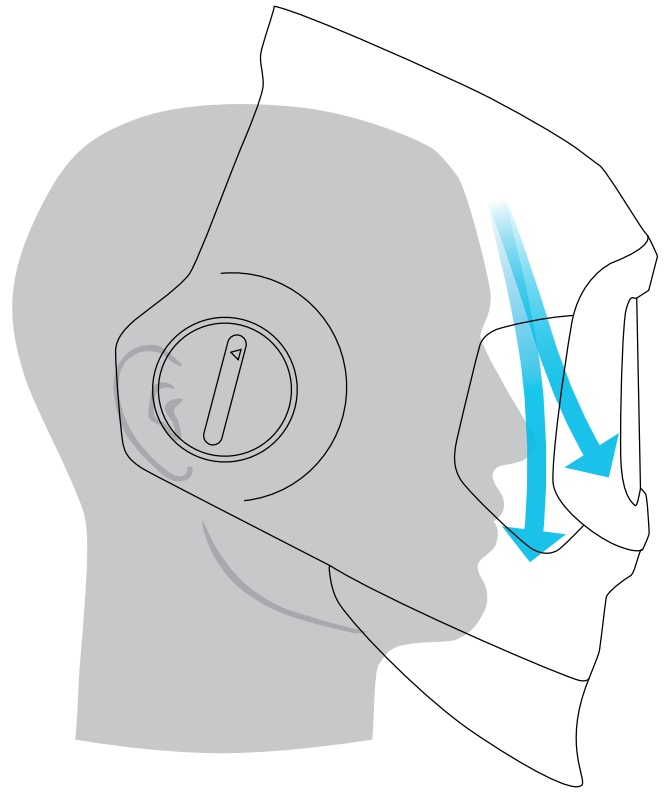

Take complete control over the direction and movement of airflow within your G5-03 Pro Air welding helmet.

Direct the air flow over your face, head, or a combination of both. Customised air distribution helps prevent your eyes from drying out, leading to increased comfort.

Left side control

Adjust the amount of air coming from the top outlet vs. the two side outlets, or choose a combination of both.

Right side control

Direct the airflow to either your face, your visor, or a combination of both.

Designed to provide powerful uniform lighting from a welding working distance.

Positioned to cast a wide light on the workpiece with configurable light intensity.

G5-03 Pro Air Task Light Kit
Part No 16 92 00

Let there be light...

Built specifically for welding, the optional helmet-mounted task light helps welders stay productive in poorly lit areas.

It delivers a better view of the work area before and after welding, which can help to reduce fatigue.

3M™ Speedglas™ Task Light is designed to be low profile and lightweight.

For welders using the 3M™ Speedglas™ Welding Helmet G5-03 Pro Air, the task light is powered by the 3M™ Adflo™ Powered Air Purifying Respirator.

Configure your coverage

Helmet comes standard with rigid neck protection and fabric head protection as shown here

To better enable you to weld when looking down, remove the rigid neck protection and replace with the small fabric neck protection **16 90 41**

Increase coverage of your head, neck and chest by adding the larger fabric head cover **16 90 23** and/or the extended fabric neck protection **16 90 42**

When you need the durability of leather, attach the leather head protector **16 90 22** and the leather neck protector **16 90 43**

To maximize coverage from sparks, add the fabric shroud **16 90 30** and the extended, larger fabric head protection **16 90 23**. Also available as a kit, **16 90 35**

Common parts between G5-01 and G5-03 Pro Air

For optimal flexibility onsite, many G5-01 spare parts are also compatible with G5-03 Pro Air. This allows you to hold less spare part inventory, while retaining the flexibility you need to customise your equipment.

All parts common with G5-01 are marked with a dot (•) after the part number.

Example: 16 90 30 • Shroud

About AWS

AWS was established in 1994 and has played a key role in the welding industry ever since.

As an advocate for welders' safety in Australia and New Zealand, AWS has published numerous Welding Safety White Papers, Welding Industry Reports, and Welding Fume Control Frameworks. AWS is a company that specialises in welding safety equipment, and it is our goal to raise awareness on the important issues that welders face.

As the sole agent for the 3M™ Speedglas™ range of welding helmets with integrated respiratory protection, the Nederman, Plymovent and Bomaksan range of portable local exhaust ventilation fume protection systems, the Translas on-gun welding fume extraction range, the range of Guide welding gloves, and a 3M personal protective equipment wholesaler, AWS are extremely well placed to help businesses understand the different types of product controls that can be introduced into the workplace to better protect welders and those who work in close proximity to welders.

For more information on welding fume monitoring, welding PPE, or welding fume LEV extraction options, please contact AWS.
